

# Reeseville Fire Department Receives Grant!

The Reeseville Fire Department recently received a WI DNR matching grant to purchase a new skid unit for our UTV. This unit was purchased for \$9,045 of which the DNR will cover \$4,500; the remainder of the costs were covered by the Reeseville Fire Service Corporation through fundraising and the Reeseville Rural Town Group through the sale of the old skid unit.

This new skid unit will allow us more versatility in its capability to carry a rescue basket to retrieve and rescue persons. Verses our old skid unit, the new skid unit has larger foam and water tanks, a larger pump & engine, electric start, electric rewind hose reel and an equipment storage area.

This new skid unit along with our stokes basket will allow us to us better rescue persons who are not easily accessible by traditional vehicles.

Please read the following press release from Compeer Financial and if you have any questions on either grant or the equipment please contact the Reeseville Fire Department at 920-210-2510, [reesevillefire@gmail.com](mailto:reesevillefire@gmail.com) or go to [www.reesevillefd.com](http://www.reesevillefd.com)
